

HELMET RECONDITIONING

As the **only OEM member of NAERA licensed by NOCSAE** we meet and exceed industry standards. All helmets are tagged with RFID tracking labels to record important information and allow easy identification throughout the process. All interior parts and faceguards are removed allowing better inspection, cleaning and sanitizing. Internal parts are reinstalled in the same helmet and rejected parts are replaced with new OEM parts. Shells are inspected, cleaned, sanitized and prepped for finish. Paint or polish. New recertification, NOCSAE, warning, size and initial season labels installed.
